

## **JES HARDWARE SOLUTIONS** **CAPABILITIES STATEMENT**

JES Hardware Solutions, an Native American-owned, SDB and Florida MBE (OSD) company based in Miami, FL, is well-recognized for its expertise as a designer of advanced technology and engineered computing systems using Network-Attached Storage (NAS), Storage Area Network (SAN), Internet Small Computer System Interface (iSCSI), engineered high speed multiple display solutions and wide area commercial wireless networks.

NAICS 541512 - Computer Systems Design Services, 518210 - Data Processing, Hosting, and Related Services, 541330 - Engineering Services, 334112 - Computer Storage Device Manufacturing, 517210 Wireless data internet data providers

JES is transforming the computer hardware industry by becoming strategic partners with organizations and manufacturers using a tailored approach to consolidate and standardize materials management practices and processes using Commercial off-the-shelf (COTS) products.

### **Our product and service core competencies include the following:**

- Computer Engineering Services
- Build to print or designed single purpose computing and Display Systems
- Commercial wireless
- CDP, Disaster recovery and Continuous systems
- SAN and iSCSI Solutions

JES working with engineers and buyers has designed a FIBRE SAN infrastructure for PC based 10,25,35,50,100 IG channel simulators for Lockheed Martin, SDS, ISTS, Rockwell Collins and L3 communications. JES also installed a 500TB-mirrored SAN for simulation design that will grow to several PB (1000TB). Just recently we have started solving Simulator control, de-brief and management problems with the F-22 Simulator project team in Marietta Ga.
